

To compare multiple PDF files and eliminate redundant data using Adobe Acrobat DC and then reproduce by chapter, you can follow these steps:

1. **Comparing PDFs with Adobe Acrobat DC:**

- Open Adobe Acrobat DC.
- Go to the "Tools" tab and select "Compare Files."
- Click on "Select File" and choose the PDF files you want to compare.
- Click "OK" to start the comparison process.
- Acrobat will highlight any differences between the files, allowing you to review and make necessary adjustments.

2. **Eliminating Redundant Data:**

- After comparing the files, identify the redundant data or repeated content across the PDFs.
- You can manually delete or edit the redundant sections in one of the files to eliminate duplication.
- Save the edited PDF file to retain the changes.

3. **Reproducing by Chapter:**

- Open the edited PDF file in Adobe Acrobat DC.
- Go to the "Tools" tab and select "Organize Pages."
- In the Organize Pages tool, you can split the PDF file by chapter:
 - Click on the "Split" button and choose "By Number of Pages" or "By Top-Level Bookmarks," depending on how your chapters are organized.
 - Split the PDF into separate files for each chapter.
 - Once split, you can rearrange the files into the desired order and save them accordingly.

4. **Generating a Polished eBook Format:**

- After organizing the PDF files by chapter, you can

further enhance the formatting and appearance of the eBook:

- Modify fonts, styles, and layouts in Adobe Acrobat DC to create a consistent and polished look.**
- Add cover pages, table of contents, headers, footers, and other elements to improve the overall presentation.**
- Review the eBook and make any final adjustments to ensure it meets your requirements.**

By following these steps, you can use Adobe Acrobat DC to compare multiple PDF files, eliminate redundant data, and reproduce the content by chapter to create a polished eBook format.
