

Connect your mobile phone to hundreds of other apps and make your work easier

Connect your mobile phones or tablet to apps such as Facebook, Gmail, Instagram, Google Sheets, Google Contact, Dropbox, Trello, Slack, Zendesk, Mailchimp and many others.

The most popular usage scenarios:

- Save your inbound/outbound phone call history to a Google spreadsheet or database
- Save incoming SMS text messages into a Google spreadsheet, CRM or database
- Send an SMS text message to phone numbers stored in a Google spreadsheet, CRM or database
- Save photos to an FTP server or Dropbox straight after taking them
- Save Instagram photos to your mobile
- Import your new phone contacts into Mailchimp and Google contacts
- SMS contests
- When I arrive at a grocery store, text my wife to ask if she needs anything

Other application examples and possibilities of use can be found at our website:
