

# Simple AI Source Recovery Tracker

*Minimal Notion template to get started quickly*

## Documents to Source

### Database Properties:

- **Document** (Title) - Name of your Google Doc
- **Link** (URL) - Direct link to the doc
- **AI Used** (Select) - Claude, ChatGPT, Perplexity, Other
- **Priority** (Select) - High, Medium, Low
- **Status** (Select) - Not Started, In Progress, Complete
- **Sources Found** (Number) - Count of verified sources
- **Notes** (Text) - Key findings and next steps

## Quick Source Log

### For each source you find:

- **Source** (Title) - Name of the source
- **URL** (URL) - Direct link
- **Type** (Select) - Academic, Government, Industry, News
- **Reliability** (Select) - High, Medium, Low
- **Document** (Relation) - Which doc this sources

## This Week's Focus

**View: High Priority Items** Filter: Priority = "High" AND Status ≠ "Complete"

### **View: Quick Wins**

Filter: Status = "Not Started" (sort by estimated time)

## Action Items

- Add 5 most important docs to database
- Complete sourcing for 1 high-priority document
- Find 3 sources for each medium-priority document

Set up weekly review reminder

---

**Getting Started:**

1. Create these two simple databases in Notion
2. Add your top 5 AI-generated documents
3. Use AI prompts to find sources for #1 priority doc
4. Gradually expand the system as you get comfortable
